DIETITIAN'S MESSAGE

Fish is a vital part of the Mediterranean diet, largely due to the region's proximity to the sea, which provides abundant access to a variety of seafood. It is also a main component of the Brain Health Food Guide's suggested intake of at least 3 times a week!

Variation

Sheet pan meals are incredibly flexible – protein, vegetables, and seasonings can all be mixed and matched according to your preference. The process of roasting also intensifies the flavors of the ingredients, and the juices released by the cooking process can be used to baste the ingredients and keep them moist and flavourful.
